Below is the excerpt from the book 'The Argumentative Indian' by Amartya Sen, published in 2005.

These essays on India were written over the last decade - about half of them over the last couple of years. The first four, which make up the first part of the collection, introduces and explains the principal themes pursued in this book, related to India's long argumentative tradition. India is an immensely diverse country with many distinct pursuits, vastly disparate convictions, widely divergent customs and a veritable feast of viewpoints. Any attempt to talk about the culture of the country, or about its past history or contemporary politics, must inescapably involve considerable selection. I need not, therefore, labour the point that the focus on the argumentative tradition in this work is also a result of choice. It does not reflect a belief that this is the only reasonable way of thinking about the history or culture or politics of India. I am very aware that there are other ways of proceeding. The selection of focus here is mainly for three distinct reasons: the long history of the argumentative tradition in India, its contemporary relevance, and its relative neglect in ongoing cultural discussions. It can in addition be claimed that the simultaneous flourishing of many different convictions and viewpoints in India has drawn substantially on the acceptance - explicitly or by implication - of heterodoxy and dialogue. The reach of Indian heterodoxy is remarkably extensive and ubiquitous.
I) The above excerpt from the book 'The Argumentative Indian' covers the diverse and polemical traditions in India.?
a. True
b. False
II) The author points out that the book is a collection of essays written between 1995 to 2005.?
